## **Rockwell Part**

Rockwell Parts - AxleTech International is a leading provider in the world of specialty vehicle drive-train systems and components along with off highway vehicles. The business prides itself on being its customers' chosen supplier. AxleTech strives to exceed and meet their customers' expectations for quality, service, technology and delivery. They believe in working in an environment that supports the highest integrity with empowered teamwork, together with a unremitting pursuit of results.

AxleTech International falls under the umbrella of General Dynamics. They place great importance on being an environmentally conscious company and providing a safe surroundings for their staff to work in. Furthermore, they have implemented lots of programs in the corporation so as to help convey these values within their business policy. AxleTech happily shares this policy and welcomes interested parties to provide them with whichever questions or comments, because they are glad to promote and share this policy with a greater knowledge of their efforts. They are extremely dedicated to improving and preserving the environment. AxleTech has an EHS program that not just protects the natural world but which also actively protects their neighbors and employees as well.

AxleTech specializes in the designing and manufacture of planetary axles meant for both commercial and military applications, that may consist of anything from airport ground support to construction equipment. They take great pride in being a ground-breaking drive-train solutions provider as well. AxleTech particularly designs axles to meet particular application demands. They have over one thousand different axle specs within their present offering. With more than one hundred years of history and knowledge, AxleTech proudly supplies the most complete solution for any of your axle requirements. The company is well known in various commercial and military applications. They offer complete axle assemblies used for aftermarket replacement requirements, along with servicing axle requirements for OE production. Their high mobility ISAS have extra details that can be found in the "ISAS" product collection.
